

Most efficient furnace available - up to 98% efficiency.

Eligible for government tax credit up to \$1,500 and gas utility rebates of \$200 or more!

Introducing the world's only 33" tall high-efficiency furnace.

Dealer Advantages

- At least 7" shorter than most competitor's high-efficiency furnaces
- Exclusive patented condensate management system eliminates the need for external trap
- Multiposition with the easiest conversion from upflow to downflow to horizontal (four-way configuration)
- Lowest leak rate of any furnace (less than 1% at 1" external)
- Slide out blower assembly for easy service
- Fully-gasketed independent access doors with view ports
- Quarter turn door latches
- High level self diagnostic controls with fault codes
- Folded and flattened doors contain no sharp edges while increasing cabinet rigidity
- Variable speed blowers bump most condensing units SEERs by at least 1 point and provide humidity control at no additional cost
- Multiple venting options (PVC 1 or 2 pipe)
- Available with fully modulating gas valve and variable speed blowers
- All units can use a standard \$22 thermostat

Customer Benefits

- Most efficient furnace available – Up to 98% efficiency
- Quietest condensing furnace available – variable speed models operate at low speed most of the time with sound levels as low as 50 dBA
- Hybrid Comfort System compatible
- 5-year parts and lifetime heat exchanger warranty
- 10-year extended parts warranty available for a nominal charge
