Competitor's unit

4 Ton* 15 SEER Condensing Unit Comparison

York® Microchannel Model #YCJF weighs only 180 lbs. and requires a 36" x 36" condenser pad which costs a light \$35.

36" x 36"
PAD

42" x 36"
PAD

Competitor's model weighs 326 lbs.* (81% heavier) and requires a 42" x 36" condenser pad which costs a hefty \$45.

*Weight is approximate. Check manufacturer's specifications for exact data.

Get the US Air Advantage with new 15 SEER Microchannel Condensing Units

- Smallest and most cost effective 15 SEER unit available – 50% smaller (cubic inches) than most competitor's units
- Lowest installation cost of any 15 SEER unit
- Uses environmentally friendly R-410A
- Uses 50% less refrigerant than standard coil units
- Microchannel condenser coil last up to 7 times longer than a standard coil
- Extremely low sound rating
- Fits easily through gates and in side yards
- Only requires a 7/8" suction line for full capacity

*Units are available in 1-1/2 through 5 tons – all units make at least 15 SEER when matched with a variable speed furnace and appropriate coil

York's design philosophy is to produce the smallest, quietest, most efficient, best value HVAC units.
