

# The smallest, quietest and most efficient non-condensing furnace available. Introducing York's new Latitude Furnace.

▲  
**Only  
33"  
tall**  
▼

Model #TGLS

## Try just one and we're confident you will come back for its many one-of-a-kind features:

- Shortest furnace available (only 33" high)
- Lowest sound level of any furnace at 61 dba\* (up to 9 dba lower than the competitors)
- Most efficient non-condensing furnace available\*\*
- Lowest leakage rate of any furnace, less than 1% at 1" external (competitor's have leak rates of up to 7%)
- Perfect for duct testing (no more taping up doors)
- Same energy use as competitor's 90% furnace with 7% leakage at 30 degree outside air temperature
- Much sturdier construction than most competitors with gasketed doors standard
- Quarter turn door latches
- Multi-position, upflow, horizontal, downflow

\*At standard CFM of 400 CFM per ton    \*\*When leakage rates are considered

York's design philosophy is to produce the smallest, quietest, most efficient, best value HVAC units.
